Testing Report Document

Group 9 - *Kevin Henry, Keenan Humm, Abdulrahman Asiri*

1. Introduction

Purpose of this document is simply to delineate the results of our test cases when executed on the current version of the Nventory system.

2. Testing Requirements

2.1. Login Page

2.1.1. RS 3.2.1

- 2.1.1.1. Invoke login with no arguments
- 2.1.1.2. Invoke login with valid email and invalid password
- 2.1.1.3. Invoke login with invalid email and valid password
- 2.1.1.4. Invoke login with valid email and valid password
- 2.1.1.5. Invoke Register New option

2.2. Registration Page

2.2.1. RS 3.2.2

- 2.2.1.1. Attempt register with no arguments
- 2.2.1.2. Attempt register with valid email and no password
- 2.2.1.3. Attempt register with no email and valid password
- 2.2.1.4. Attempt register with valid email and password
- 2.2.1.5. Attempt Back to Login option

2.3. Nventory Home Page

2.3.1. RS 3.2.3

- 2.3.1.1. Attempt to load home page

2.3.2. RS 3.2.4

- 2.3.2.1. Invoke New Checkout option

2.3.3. RS 3.2.5

- 2.3.3.1. Invoke Administrative Tools option

2.3.4. RS 3.2.6

- 2.3.4.1. Invoke Logout option

2.4. Administrative Tools Page

2.4.1. RS 3.2.5

- 2.4.1.1. Invoke Products option
- 2.4.1.2. Invoke Labs option
- 2.4.1.3. Invoke Checkouts option
- 2.4.1.4. Invoke Go Back option

2.5. Products Page

2.5.1. RS 3.2.5.1.3

- 2.5.1.1. Invoke Go Back option
 - 2.5.1.2. Invoke Edit Product option
 - 2.5.1.3. Invoke New Product option
 - 2.5.1.4. Invoke Remove Product option
- 2.6. Edit Product Page
 - 2.6.1. *RS 3.2.5.1.3.1*
 - 2.6.1.1. Attempt an edit of one field on one record
 - 2.6.1.2. Attempt an edit of one field on more than one record
 - 2.6.1.3. Attempt an edit of multiple fields on one record
 - 2.6.1.4. Attempt an edit of multiple fields on multiple records
 - 2.6.1.5. Invoke Go Back option
- 2.7. New Product Page
 - 2.7.1. *RS 3.2.5.1.3.1*
 - 2.7.1.1. Attempt Submit option with no arguments
 - 2.7.1.2. Attempt Submit option with valid arguments
 - 2.7.1.3. Invoke Go Back option
- 2.8. Remove Product Page
 - 2.8.1. *RS 3.2.5.1.3.1*
 - 2.8.1.1. Invoke Remove Product option
 - 2.8.1.2. Invoke Go Back option
- 2.9. Checkouts Page
 - 2.9.1. *RS 3.2.5.1.2*
 - 2.9.1.1. Invoke New Checkout option
 - 2.9.1.2. Invoke Remove Checkout option
 - 2.9.1.3. Invoke Go Back option
- 2.10. New Checkout Page
 - 2.10.1. *RS 3.2.5.1.2.1*
 - 2.10.1.1. Attempt Submit with no arguments
 - 2.10.1.2. Attempt Submit with no Customer argument
 - 2.10.1.3. Attempt Submit with no Product arguments
 - 2.10.1.4. Attempt Submit with one Product and Customer
 - 2.10.1.5. Attempt Submit with multiple Products and a Customer
 - 2.10.1.6. Invoke Go Back option
- 2.11. Remove Checkout Page
 - 2.11.1. *RS 3.2.5.2.1*
 - 2.11.1.1. Attempt Remove option on one record
 - 2.11.1.2. Attempt Remove option on another record
 - 2.11.1.3. Invoke Go Back option
- 2.12. Labs Page

2.12.1. *RS 3.2.5.1.1*

- 2.12.1.1. Invoke New Lab option
- 2.12.1.2. Invoke Remove Lab option
- 2.12.1.3. Invoke Go Back option

2.13. New Lab Page

2.13.1. *RS 3.2.5.1.1*

- 2.13.1.1. Submit with no arguments
- 2.13.1.2. Submit with only a Lab Name argument
- 2.13.1.3. Submit with a Name and one CostNumber
- 2.13.1.4. Submit with a Name and multiple CostNumbers
- 2.13.1.5. Invoke Go Back option

2.14. Remove Lab Page

2.14.1. *RS 3.2.5.1.1*

- 2.14.1.1. Attempt remove on one record
- 2.14.1.2. Attempt remove on another record
- 2.14.1.3. Invoke Go Back option

3. Test Case Results

3.1 Login page

3.1.1 Test 1

Result: PASS

Purpose: Invoke login with no arguments

Setup: launch application or navigate to start page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Email	-	False	Stays on login page.	Stays on login page.
Password	-	False	Stays on login page.	Stays on login page.

Testing Requirements covered:

2.1.1.1 Invoke login with no arguments

3.1.2 Test 2

Result: PASS

Purpose: Invoke login with valid email and invalid password

Setup: launch application or navigate to start page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual output
Email	Admin@email.com	True	Stays on login page.	Stays on login page.
Password	12345	False	Stays on login page.	Stays on login page.

Testing Requirements covered:

2.1.1.2 Invoke login with valid email and invalid password

3.1.3 Test 3

Result: PASS

Purpose: Invoke login with invalid email and valid password

Setup: launch application or navigate to start page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Email	Adminwrong@email.com	False	Stays on login page.	Stays on login page.
Password	abs2323T	True	Stays on login page.	Stays on login page.

Testing Requirements covered:

2.1.1.3 Invoke login with invalid email and valid password

3.1.4 Test 4

Result: PASS

Purpose: Invoke login with valid email and valid password

Setup: launch application or navigate to start page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Email	Admin@email.com	True	-	-
Password	1234	True	Login successful. User is	Login successful. User is

			directed to home page	directed to home page
--	--	--	-----------------------	-----------------------

Testing Requirements covered:

2.1.1.4 Invoke login with valid email and valid password

3.1.5 Test 5

Result: PASS

Purpose: Invoke Register New option

Setup: launch application or navigate to start page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Register New User	User is directed to registration page	User is directed to registration page

Testing Requirements covered:

2.1.1.5 Invoke Register New option

3.2 Registration page

3.2.1 Test 6

Result: PASS

Purpose: Attempt register with no arguments

Setup: Navigate to registration page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Email	-	False	Stays on register page.	Stays on register page.
Password	-	False	Stays on register page.	Stays on register page.

Testing Requirements covered:

2.2.1.1 Attempt register with no arguments

3.2.2 Test 7

Result: PASS

Purpose: Attempt register with valid email and no password

Setup: Navigate to registration page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Email	Admin@email.com	True	-	-
Password	-	False	Stays on register page.	Stays on register page.

Testing Requirements covered:

2.2.1.2 Attempt register with valid email and no password

3.2.3 Test 8

Result: PASS

Purpose: Attempt register with no email and valid password

Setup: Navigate to registration page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Email	-	False	-	-
Password	0012B700	True	Stays on register page.	Stays on register page.

Testing Requirements covered:

2.2.1.3 Attempt register with no email and valid password

3.2.4 Test 9

Result: PASS

Purpose: Attempt register with valid email and valid password

Setup: Navigate to registration page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Email	Admin@email.com	True	User is directed to home page	User is directed to home page
Password	1234	True	User is directed to home page	User is directed to home page

Testing Requirements covered:

2.2.1.4 Attempt register with valid email and valid password

3.2.5 Test 10

Result: PASS

Purpose: Attempt Back to Login option

Setup: Navigate to registration page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Back to Login	User is directed to login page	User is directed to login page

Testing Requirements covered:

2.2.1.5 Attempt Back to Login option

3.3 Nventory Home Page

3.3.1 Test 11

Result: PASS

Purpose: Attempt to load home page

Setup: Login

Inputs and Outputs

Input	Expected Output	Actual Output
Successful login	User is directed to home page	User is directed to home page

Testing Requirements covered:

2.3.1.1 Attempt to load home page

3.3.2 Test 12

Result: PASS

Purpose: Invoke New Checkout option

Setup: Navigate to registration page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
New Checkout	User is directed to Checkout page	User is directed to Checkout page

Testing Requirements covered:

2.3.2.1 Invoke New Checkout option

3.3.3 Test 13

Result: PASS

Purpose: Invoke Administrative Tools option

Setup: Navigate to registration page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Admin Tools	User is directed to Admin Tools page	User is directed to Admin Tools page

Testing Requirements covered:

2.3.3.1 Invoke Administrative Tools option

3.3.4 Test 14

Purpose: Invoke Logout option

Setup: Navigate to registration page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Logout	User is logged out and directed to login page	User is logged out and directed to login page

Testing Requirements covered:

2.3.4.1 Invoke Logout option

3.4 Administrative Tools Page

3.4.1 Test 12

Result: PASS

Purpose: Invoke Products option

Setup: Navigate to administrative tools page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Products	User is directed to product page	User is directed to product page

Testing Requirements covered:

2.4.1.1 Invoke Products option

3.4.2 Test 13

Result: PASS

Purpose: Invoke Labs option

Setup: Navigate to administrative tools page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Labs	User is directed to labs page	User is directed to labs page

Testing Requirements covered:

2.4.1.2 Invoke Labs option

3.4.3 Test 14

Result: PASS

Purpose: Invoke Checkouts option

Setup: Navigate to administrative tools page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Checkouts	User is directed to checkouts page	User is directed to checkouts page

Testing Requirements covered:

2.4.1.3 Invoke Checkouts option

3.4.4 Test 15

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to administrative tools page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go Back	User is returned to home page	User is returned to home page

Testing Requirements covered:

2.4.1.4 Invoke Go Back option

3.5 Products Page

3.5.1 Test 16

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to products page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go back	User is returned to admin tools page	User is returned to admin tools page

Testing Requirements covered:

2.5.1.1 Invoke Go Back option

3.5.2 Test 17

Result: PASS

Purpose: Invoke Edit Product option

Setup: Navigate to products page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Edit Product	User is directed to edit products page	User is directed to edit products page

Testing Requirements covered:

2.5.1.2 Invoke Edit Product option

3.5.3 Test 18

Result: PASS

Purpose: Invoke New Product option

Setup: Navigate to products page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
-----------------	-----------------	---------------

New Product	User is directed to add product page	User is directed to add product page
-------------	--------------------------------------	--------------------------------------

Testing Requirements covered:

2.5.1.3 Invoke New Product option

3.5.4 Test 19

Result: PASS

Purpose: Invoke Remove Product option

Setup: Navigate to products page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Remove product	User is directed to Remove product page	User is directed to Remove product page

Testing Requirements covered:

2.5.1.4 Invoke Remove Product option

3.6 Edit Product Page

3.6.1 Test 20

Result: PASS

Purpose: Attempt an edit of one field on one record

Setup: Navigate to edit products page

Inputs and Outputs

Input Field	Input Value	Action	Expected Output	Actual Output
Name	Any string	Apply to Any Row	Updated pushed to MongoDB	Updated pushed to MongoDB
New Price/Quantity	Any integer	Apply to Any Row	Updated pushed to MongoDB	Updated pushed to MongoDB

Testing Requirements covered:

2.6.1.1 Attempt an edit of one field on one record

3.6.2 Test 21

Result: PASS

Purpose: Attempt an edit of one field on more than one record

Setup: Navigate to edit products page.

Inputs and Outputs

Input Field	Input Value	Action	Expected Output	Actual Output
Name	Any string	Apply to any rows	Updated pushed to MongoDB	Updated pushed to MongoDB
New Price/Quantity	Any integer	Apply to any rows	Updated pushed to MongoDB	Updated pushed to MongoDB

Testing Requirements covered:

2.6.1.2 Attempt an edit of one field on more than one record

3.6.3 Test 22

Result: PASS

Purpose: Attempt an edit of multiple fields on one record

Setup: Navigate to edit products page.

Inputs and Outputs

Input Field	Input Value	Action	Expected Output	Actual Output
Name	Any string	Apply to any rows	Updated pushed to MongoDB	Updated pushed to MongoDB
New Price/Quantity	Any integer	Apply to any rows	Updated pushed to MongoDB	Updated pushed to MongoDB

Testing Requirements covered:

2.6.1.3 Attempt an edit of multiple fields on one record

3.6.4 Test 23

Result: PASS

Purpose: Attempt an edit of multiple fields on multiple records

Setup: Navigate to edit products page

Inputs and Outputs

Input Field	Input Value	Action	Expected Output	Actual Output
Name	Any string	Apply to any rows	Updated pushed to MongoDB	Updated pushed to MongoDB
New Price/Quantity	Any integer	Apply to any rows	Updated pushed to MongoDB	Updated pushed to MongoDB

Testing Requirements covered:

2.6.1.4 Attempt an edit of multiple fields on multiple records

3.6.5 Test 24

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to edit products page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
-----------------	-----------------	---------------

Go Back	User is directed to products page	User is directed to products page
---------	-----------------------------------	-----------------------------------

Testing Requirements covered:

2.6.1.5 Invoke Go Back option

3.7 New Product Page

Result: PASS

3.7.1 Test 25

Purpose: Attempt Submit option with no arguments

Setup: Navigate to new products page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Name	-	False	Name is required	Name is required
Price	-	False	Price is required	Price is required
Quantity	-	False	Quantity is required	Quantity is required

Testing Requirements covered:

2.7.1.1 Attempt Submit option with no arguments

3.7.2 Test 26

Result: PASS

Purpose: Attempt Submit option with valid arguments

Setup: Navigate to new products page.

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Name	kevin	True	Updated pushed to MongoDB	Updated pushed to MongoDB
Price	123	True	Updated pushed to MongoDB	Updated pushed to MongoDB
Quantity	321	True	Updated pushed to MongoDB	Updated pushed to MongoDB

Testing Requirements covered:

2.7.1.2 Attempt Submit option with valid arguments

3.7.3 Test 27

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to new products page.

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go Back	User is directed to products page	User is directed to products page

Testing Requirements covered:

2.7.1.3 Invoke Go Back option

3.8 Remove Products Page

3.8.1 Test 28

Result: PASS

Purpose: Invoke Remove Product option

Setup: Navigate to remove products page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
X	Product is removed from MongoDB	Product is removed from MongoDB

Testing Requirements covered:

2.8.1.1 Invoke Remove Product option

3.8.2 Test 29

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to remove products page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go back	User is returned to home page	User is returned to home page

Testing Requirements covered:

2.8.1.2 Invoke Go Back option

3.9 Checkouts Page

3.9.1 Test 30

Result: PASS

Purpose: Invoke New Checkout option

Setup: Navigate to checkouts page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
New Checkout	User is directed to new checkout page	User is directed to new checkout page

Testing Requirements covered:

2.9.1.1 Invoke New Checkout option

3.9.2 Test 31

Result: PASS

Purpose: Invoke Remove Checkout option

Setup: Navigate to checkouts page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Remove Checkout	User is directed to remove checkout page	User is directed to remove checkout page

Testing Requirements covered:

2.9.1.2 Invoke Remove Checkout option

3.9.3 Test 32

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to checkouts page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go back	User is directed to admin tools page	User is directed to admin tools page

Testing Requirements covered:

2.9.1.3 Invoke Go Back option

3.10 New Checkout Page

3.10.1 Test 33

Result: PASS

Purpose: Attempt Submit option with no arguments

Setup: Navigate to new checkouts page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Products	-	False	Products is required	Products is required
Quantity	-	False	Quantity is required	Quantity is required
Customer	-	False	Customer is required	Customer is required

Testing Requirements covered:

2.10.1.1 Attempt Submit option with no arguments

3.10.2 Test 34

Result: PASS

Purpose: Attempt Submit with no Customer argument

Setup: Navigate to new checkouts page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Products	qwe	True	-	
Quantity	123	True	-	
Customer	-	False	Customer is required	Customer is required

Testing Requirements covered:

2.10.1.2 Attempt Submit with no Customer argument

3.10.3 Test 35

Result: PASS

Purpose: Attempt Submit with no Product arguments

Setup: Navigate to new checkouts page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Products	-	False	Products is required	Products is required
Quantity	123	True	-	
Customer	kevin	True	-	

Testing Requirements covered:

2.10.1.3 Attempt Submit with no Product arguments

3.10.4 Test 36

Result: PASS

Purpose: Attempt Submit with one Product and Customer

Setup: Navigate to new checkouts page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Products	product	True	-	
Quantity	1	True	-	
Customer	kevin	True	Checkout pushed to MongoDB	Checkout pushed to MongoDB

Testing Requirements covered:

2.10.1.4 Attempt Submit with one Product and Customer

3.10.5 Test 37

Result: PASS

Purpose: Attempt Submit with multiple Products and a Customer

Setup: Navigate to new checkouts page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Products	Kevin	True	-	
Products	Keenan	True	-	
Quantity	1	True	-	
Customer	Abdul	True	Checkout pushed to MongoDB	Checkout pushed to MongoDB

Testing Requirements covered:

2.10.1.5 Attempt Submit with multiple Products and a Customer

3.10.6 Test 38

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to new checkouts page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go Back	User is directed to checkouts page	User is directed to checkouts page

Testing Requirements covered:

2.10.1.6 Invoke Go Back option

3.11 Remove Products Page

3.11.1 Test 39

Result: PASS

Purpose: Attempt Remove option on one record

Setup: Navigate to remove checkouts page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
X	Checkout is removed from MongoDB	Checkout is removed from MongoDB

Testing Requirements covered:

2.11.1.1 Attempt Remove option on one record

3.11.2 Test 41

Result: PASS

Purpose: Attempt Remove option on another record

Setup: Navigate to remove checkouts page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
X	Checkout is removed from MongoDB	Checkout is removed from MongoDB

Testing Requirements covered:

2.11.1.2 Attempt Remove option on another record

3.11.3 Test 41

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to remove checkouts page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go back	User is returned to checkouts page	User is returned to checkouts page

Testing Requirements covered:

2.11.1.3 Invoke Go Back option

3.12 Labs Page

3.12.1 Test 42

Result: PASS

Purpose: Invoke New Lab option

Setup: Navigate to labs page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
New Lab	User is directed to new lab	User is directed to new lab

	page	page
--	------	------

Testing Requirements covered:

2.12.1.1 Invoke New Lab option

3.12.2 Test 43

Result: PASS

Purpose: Invoke Remove Lab option

Setup: Navigate to Lab page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Remove Checkout	User is directed to remove Lab page	User is directed to remove Lab page

Testing Requirements covered:

2.12.1.2 Invoke Remove Lab option

3.12.3 Test 44

Purpose: Invoke Go Back option

Setup: Navigate to Lab page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go back	User is directed to admin tools page	User is directed to admin tools page

Testing Requirements covered:

2.12.1.3 Invoke Go Back option

3.13 New Lab Page

3.13.1 Test 45

Result: PASS

Purpose: Submit with no arguments

Setup: Navigate to new lab page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Name	-	False	Name is required	Name is required
Cost Numbers	-	False	Cost Numbers is required	Cost Numbers is required

Testing Requirements covered:

2.13.1.1 Submit with no arguments

3.13.2 Test 46

Result: PASS

Purpose: Submit with only a Lab Name argument

Setup: Navigate to new lab page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Name	kevin	True	-	
Cost Numbers	-	False	Customer is required	Customer is required

Testing Requirements covered:

2.13.1.2 Submit with only a Lab Name argument

3.13.3 Test 47

Result: PASS

Purpose: Submit with a Name and one CostNumber

Setup: Navigate to new lab page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Name	kevin	True	-	
Cost Numbers	123	True	Checkout pushed to MongoDB	Checkout pushed to MongoDB

Testing Requirements covered:

2.13.1.3 Submit with a Name and one CostNumber

3.13.4 Test 48

Result: PASS

Purpose: Submit with a Name and multiple CostNumbers

Setup: Navigate to new lab page

Inputs and Outputs

Input Field	Input Value	Information accepted	Expected Output	Actual Output
Name	kevin	True	-	
Cost Numbers	123	True	-	
Cost Numbers	133	True	Checkout pushed to MongoDB	Checkout pushed to MongoDB

Testing Requirements covered:

2.13.1.4 Submit with a Name and multiple CostNumbers

3.13.4 Test 49

Purpose: Invoke Go Back option

Setup: Navigate to new lab page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go Back	User is directed to labs page	User is directed to labs page

Testing Requirements covered:

2.13.1.5 Invoke Go Back option

3.14 Remove Lab Page

3.14.1 Test 50

Result: PASS

Purpose: Attempt remove on one record

Setup: Navigate to remove lab page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
X	Lab is removed from MongoDB	Lab is removed from MongoDB

Testing Requirements covered:

2.14.1.1 Attempt remove on one record

3.14.2 Test 51

Result: PASS

Purpose: Attempt remove on another record

Setup: Navigate to remove lab page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
X	Lab is removed from	Lab is removed from

	MongoDB	MongoDB
--	---------	---------

Testing Requirements covered:

2.14.1.2 Attempt remove on another record

3.14.3 Test 52

Result: PASS

Purpose: Invoke Go Back option

Setup: Navigate to remove lab page

Inputs and Outputs

Selected Button	Expected Output	Actual Output
Go back	User is returned to Labs page	User is returned to Labs page

Testing Requirements covered:

2.14.1.3 Invoke Go Back option
